

Safe Ritual Closure in Emergencies

Note to Self:
Ignore the
warnings.
For real this time.

Approximately 20 students will die this year from exposure to mystic discharge and its complications.

11 of these deaths can be prevented with proper ritual closure practices.

Need to close? Remember OCCULT!

Trust me, I know.

OBSERVE

Surroundings
Allies
Lessons/Training
Time

No No approach
Five

It's best to cut the power and wait.

CHECK

For mystic power sources, and disable them quickly.

Don't Approach if there's anything more than a gentle pull on the red!

CARRY

Any objects that could become hazardous at least 15 meters away.

That's 11 paces for y'all

THEN,

If you CANNOT wait for in-person assistance:

First call, then:

No drugs for 30 centuries but I'm still fucking high.

USE OTHERS

To reduce mystic discharge to a survivable level.

Act in Sync
Act in Sync!

LISTEN

To instructions from a trained occultist

A Box fan can work equally well, on occasion...

TAKE

Yourselves to the emergency room ASAP

Ignore anyone who's been transmuted into Salt. Obviously.
